This is the accepted author manuscript (AAM). The final published version (version of record) is available online via Elsevier at http://dx.doi.org/10.1016/j.brat.2016.08.009. Please refer to any applicable terms of use of the publisher.
Figure Caption

*Figure 1.* Overview of the procedure of the present study. *Note.* FBQ fear beliefs questionnaire, NRM nature reserve map.

*Figure 2.* The interaction between anxiety symptoms and information type on fear beliefs at T1.

*Figure 3.* The interaction between dyad members’ threat avoidance at T1 on a child’s threat avoidance at T2.
Figure 1

Baseline (T1)

Individual

- Ambiguous Information
  - Animal A

- FBQ & NRM for Animal A

- Threat Information
  - Animal B

- FBQ & NRM for Animal B

In Pairs

- Ambiguous Information
  - Animal A

- FBQ & NRM for Animal A

- Peer Discussion

- FBQ & NRM for Animal B

Post-test (T2)

- Threat Information
  - Animal B

- Peer Discussion

- FBQ & NRM for Animal B
Figure 2

![Diagram showing the relationship between Trait Anxiety and Fear Beliefs at Time 1. There are two lines: one for Threat and one for Ambiguous information type. The Threat line is a solid blue line, and the Ambiguous line is a dashed brown line. The y-axis represents Fear Beliefs at Time 1, ranging from 20 to 50, and the x-axis represents Trait Anxiety, ranging from 10th percentile to 90th percentile.](image-url)
