

Centre for Action Research and Critical Inquiry in Organisations

Masterclass with Dr Melissa Gregg

Dr Gregg is a leading world scholar in the field of gender, technology and critical management studies. She is best known for her ethnographic research of information professionals in the book *Work's Intimacy* (Polity 2011), and as co-editor of the influential collection *The Affect Theory Reader* (with Gregory Seigworth, Duke 2010). Dr Gregg is currently working as a Principal Engineer at Intel Corporation and is exceptionally well placed to address the challenges in bridging the gap between organisational scholarship and practice.

27 February 2017, 9:30—17:00

This Masterclass is aimed at postgraduate students, academic staff and the wider community and will engage the participants in a critical, interdisciplinary debate on gender, subjectivity, organisations and organising. The day will be organised around recent themes in Dr Gregg's work that explore technology, gender and culture in Silicon Valley; and methodologies for studying work and society.

Location: 1 Priory Road, G.02 Ground Floor Meeting Room, Bristol, BS8 1TX
